PROJECTS

Enterprise ERP System

Designed and developed a scalable ERP solution using Laravel (back-end) and Vue.js (front-end), covering modules such as HR, Finance, Inventory, CRM, and Project Management. Integrated real-time data flows, dynamic dashboards, role-based access, and RESTful APIs to ensure seamless performance across departments.

KEY ACHIEVEMENTS

Full ERP System Delivered from Scratch

Spearheaded the end-to-end development of a custom ERP system, enhancing organizational operations across HR, Finance, and Inventory. Improved data visibility and workflow automation for over 5 internal teams.

Backend Optimization & System Performance

Reduced API response times by 40% through Laravel query optimization and efficient Vue component loading. Boosted user experience and server performance.

Scalable Deployment & Maintenance Strategy

Implemented CI/CD pipelines, Dockerized the application, and deployed the ERP on a Linux-based VPS with SSH, ensuring secure and continuous updates.
